## About NAAS

**"A small body of determined spirits fired by an unquenchable faith in their mission can alter the course of history."  
- Mahatma Gandhi**

### NAAS Technologies

NAAS is a leading global Technology and IT Enterprise with annual revenues of US \$20,000 within 5 months of operation.

Our IT services, business solutions, and outsourcing bring you a level of certainty that no other competitor can match. You'll experience requirements that are met on-time, within budget, and with high quality; greater efficiency and responsiveness to your business; and the ability to shift investment to strategic initiatives rather than tactical functions.

NAAS Tech defines designs and delivers technology-enabled business solutions that help Global companies win in a Flat World. NAAS also provides a complete range of services by leveraging our domain and business expertise and strategic alliances with leading technology providers.

NAAS Tech offerings span business and technology consulting, application services, systems integration, product engineering, custom software development, maintenance, independent testing and validation services, IT infrastructure services and business process outsourcing.

### Services

NAAS Technologies web development services include business development, web design, web content development, client-side/server-side scripting, and web site hosting. Our services encompass internet applications, electronic businesses, or social network services.

NAAS Tech's application development services help you address evolving business and technology challenges by defining, designing and building applications tailored to meet your business requirements. We deliver high-quality, flexible applications that are easy to maintain; secure and easy to deploy using the Global Delivery Model.

NAAS Techs application maintenance services help you get the best out of your existing IT applications. The services span offshore-ability analysis, maintenance and enhancement and are delivered using the Global Delivery Model. We use structured knowledge management tools and other IP developed by our Maintenance Center of Excellence to enhance the life of your systems, ensure that they evolve with your business, reduce system downtime and help you focus on strategic initiatives by minimizing the time spent on routine activities.

### Products

NAAS is proud to announce it's first and foremost Business Intelligence tool "RADAR".

RADAR stands for Revenue Analysis Detection and Ranging. RADAR is a complete, framework based BI solution that delivers intuitive, role-based intelligence for everyone in an organization—from associate employees to senior management—that enable better decisions, actions, and business processes.

Based on best practices, this solution enables organizations to gain more insight and greater value from a range of data sources and applications. RADAR BI is built on the NAAS Phoenix engine, a comprehensive, innovative and an in-house technology to build interactive web applications.

This enables organizations to realize the value of the BI Application, such as rapid deployment, lower TCO, and built-in best practices, while also being able to easily extend those solutions to meet their specific needs, or build completely custom BI applications—all on one common RADAR foundation.
